

Exp1. Spatial grouping

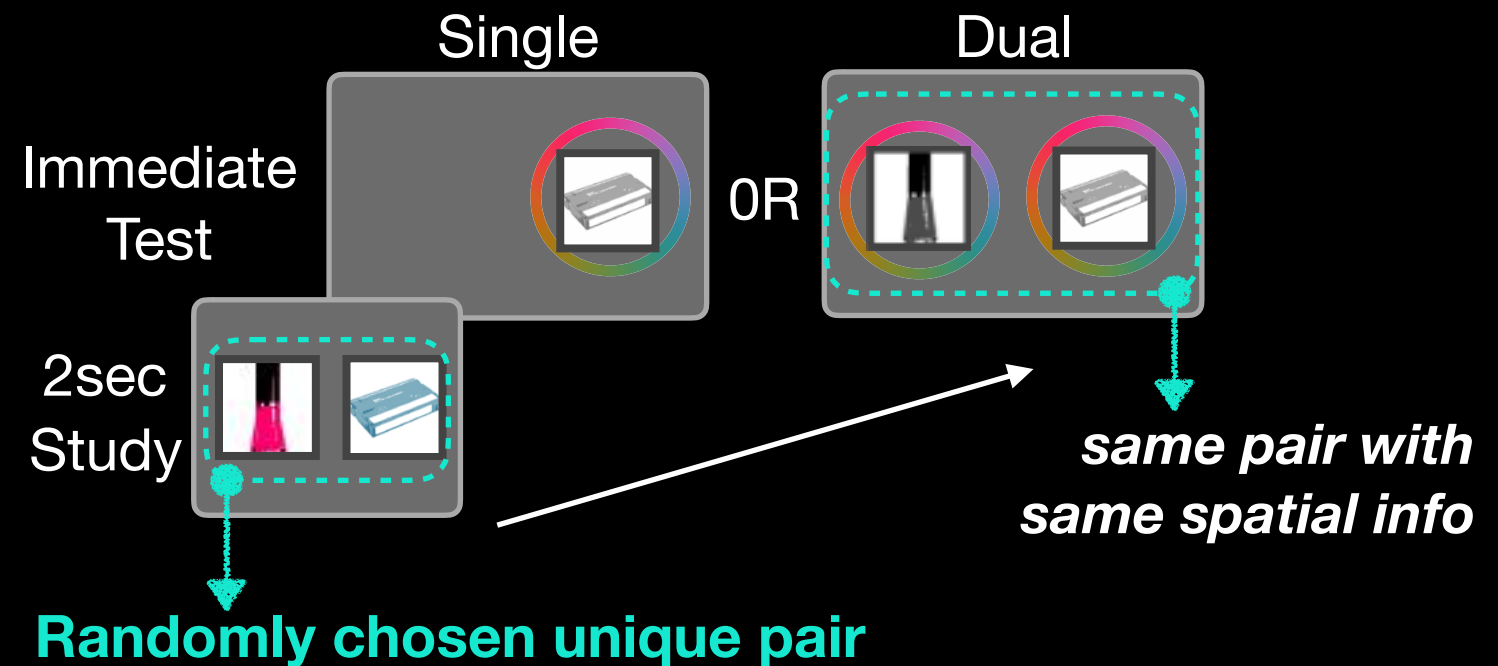

- 5 blocks x 40 trials = 200 trials (400 objects)
 - WM : 200 objects (100 single, 100 dual)
 - LTM : 200 objects (100 single, 100 dual)

In each block
(40 trials; 80 objects),

Half of trials (20 trials;
either single or dual) will
be randomly selected
and tested immediately
(WM cond)

The other will be tested
at the end of the block
(LTM cond).

WM

LTM
